Summary

Passionate about technology and driven by curiosity, I'm Thareesh Kumar Gatti, a student with a strong focus on Full-Stack Development, Java, and Data Science. With a solid foundation in core programming concepts and hands-on experience with the MERN stack, I enjoy building functional, user-friendly applications and exploring data-driven solutions.

I chose the field of Computer Science because of my deep enthusiasm for data science — I'm especially intrigued by how meaningful in

Experience

Education

Malla Reddy University Hyderabad

Bachelor of Technology - BTech, Engineering, August 2023 - July 2027

Actively involved in student tech communities at Malla Reddy University, where I explore my passion for software development, problem-solving, and emerging technologies. I regularly participate in peer coding circles focused on Java, DSA, and full-stack development using the MERN stack. Attending tech webinars and meetups has helped me stay updated with trends like AI, Web3, and data science. I'm part of informal student groups where we brainstorm ideas, debug code together, and build small apps using

real-world tools. These activities have strengthened my technical foundation, team collaboration, and curiosity-driven learning beyond the classroom. I'm constantly exploring GitHub projects, building mini-tools, and experimenting with APIs to enhance my practical knowledge.
