Summary

B.Tech Data Science student with hands-on experience in data analysis, software development, and career-focused technology projects. Strong communication, analytical thinking, problem-solving, and collaboration skills with an interest in business development, sales, marketing, and the education sector. Experienced in building solutions around skill-gap identification, candidate-job matching, and customer sentiment analysis. Quick learner with an ownership mindset and an interest in understanding customer requirements and delivering measurable outcomes.

Education

Malla Reddy University <i>Bachelor of Technology in Data Science</i>	Hyderabad, India 2023 – May 2027
--	-------------------------------------

Experience

Internship Studio <i>Data Science Intern</i> – Processed and analyzed 5+ real-world datasets using Python, Pandas, and NumPy, resolving missing values, duplicates, inconsistencies, and data-quality issues. – Performed exploratory analysis to identify trends, patterns, correlations, and anomalies and convert raw data into structured insights. – Designed structured workflows for data validation, cleaning, normalization, feature transformation, and analysis. – Applied statistical analysis and analytical problem-solving to support predictive modeling and data-driven decision-making.	Hyderabad, India Aug 2025 – Feb 2026
--	---

Projects

AI Skill Gap Analyzer <i>MERN Stack, NLP, MongoDB</i> – Developed a career-focused platform that compares candidate profiles against job-specific requirements to identify matched and missing skills. – Designed the solution around a core employability problem: identifying gaps between a candidate’s academic preparation and industry expectations. – Built structured candidate-to-role analysis across companies, job roles, skills, job requirements, and resumes. – Developed backend APIs using Node.js, Express.js, MongoDB, and NLP-based resume processing to support skill matching and gap identification.	
AutoPulse – Customer Sentiment Analysis <i>Python, NLP, LSTM, Bi-LSTM</i> – Built an end-to-end sentiment analysis pipeline to collect and analyze customer reviews and classify feedback as positive, negative, or neutral. – Analyzed customer feedback across pricing, vehicle condition, delivery, documentation, mileage, and customer service. – Performed aspect-level sentiment analysis to identify specific factors influencing customer experience.	
ML-Powered Resume Screener <i>Python, NLP, Scikit-learn</i> – Developed an NLP-based resume screening system to classify candidate profiles and rank resumes against job requirements. – Implemented text preprocessing, TF-IDF feature extraction, and SVM-based candidate classification workflows.	

Skills

Business & Communication: Communication, Active Listening, Presentation, Team Collaboration, Problem Solving, Analytical Thinking, Stakeholder Understanding
Business Development: Lead Generation Fundamentals, Customer Need Identification, Consultative Selling Fundamentals, Outreach Strategy, Sales Funnel Fundamentals, Customer Relationship Building
Programming & Data: Python, Java, JavaScript, SQL, Pandas, NumPy, Data Analysis, Statistical Analysis
Development & Tools: React.js, Node.js, Express.js, MongoDB, REST APIs, Git, GitHub, Postman

Certifications

Microsoft Data Science Professional Certificate	2025
Data Science Internship Certificate – Internship Studio	2025
Deloitte Data Analytics Virtual Job Simulation	2024
